*The Lecture Series in the
Mathematical Sciences Presents Our Guest:*

Prof. Dharam Chopra
Wichita State University

"Combinatorics and Fractional Factorial Designs"

Abstract:

In this lecture we will describe some combinatorial arrays which have been extensively used in the construction of balanced fractional factorial designs. We give a very brief historical review of these arrays, discuss their relationships with other combinatorial structures, and present some open research problems. This talk should be accessible to all.

Friday, October 8, 2004
3:00 PM in 372 Jabara Hall

*Please come join us for refreshments before the lecture
at 2:30 p.m. in room 353 Jabara Hall.*
