

How to enroll in the Online Homework system.

Note:

To enroll in the online homework system, MyMathLab, you will have to purchase an access code. You may purchase this code from the bookstore bundled with a new book for about \$120.

Or you may also purchase it online for about \$78 using a credit or debit card.

(It may also be available with used books - but you need to make sure the access code is not used.)

Note also that the textbook for this class is optional since you can access it in PDF form from the online homework system.

But the online homework access code is required.

Instructions:

1) Point your web-browser to <http://www.coursecompass.com/>

2) Click: Students: Register

3) Click: Next

4) Enter your course ID: (found on syllabus – looks like “axmann” with a five digit number after it) and click: Find Course.

5) Do either step 5a or 5b (not both)...

5a) If you purchased an access code from the book store, choose Access Code and enter it in the space provided.

OR

5b) If you want to use a credit or debit card to buy the code, click Buy Now then click the Buy button

In either case, you will be walked through the remaining steps of enrolling in the course - just follow the steps and enter all of the required information.

If you need more help, there is a video tutorial button at the top of most of the pages that will take you through the process step-by-step.
