Project for STAT764

This project consists of a presentation on an analysis of a data set. An important part of the project is to obtain a real data set that allows you to apply some of the techniques studied in class.

THE MAIN OBJECTIVES OF THE PROJECT

- Identify a suitable data set.

- Come up with meaningful research questions based on the data.

- Experience some of the problems encountered when analyzing real data.

- Gain practice in a presentation.

THE PRESENTATION SHOULD ADDRESS:

1. **Where** you find the data set?

2. **Why** the problem is of interest?

3. **Which** method or model is appropriate to this problem?

4. **How** do you apply the method to analysis the data set?

5. **What** is your conclusion?

THE ROLE OF AUDIENCE

○ Ask at least one related question, and give some comments
