

February 2001

Tobacco farmers in Canada requested this year  
A share of federal government agricultural assistance  
To retrofit their curing facilities in order to produce  
Tobacco that is up to 95% nitrosamine safer to smoke  
March 2001

Anti-smokers rejected them and condemned the safe tobacco

April 2001

Billions of dollars have been spent trying to eradicate Marijuana  
Yet today it is about to be legalized around the world because  
Marijuana is believed to alleviate various diseases  
But is also known to impair judgement, memory, and abilities  
Tobacco is also believed to alleviate various diseases  
But does Not impair judgement, memory, or abilities

Canada is among the 1st of many nations to legalize Marijuana  
for medicinal use, and government-approve growers & dealers  
And at the same time declare all out war on tobacco

WHO is smoking WHAT??

Depression is one of the diseases that tobacco  
is believed to alleviate  
As smoking rates dropped-Depression Rates Rose

January 2001

Ontario Solicitor-General declares  
Today "...organized crime is a threat to our way of life..."  
when the Hells Angels, now a global corporation,  
with it's own website hosted in France, took over Canada  
The Hells Angels love it when sin taxes go up,  
The possibility of criminalized tobacco--makes them drool

Prohibition in the early 20th century was another era  
Of strong anti-everything, that gave birth to organized crime

Canadian lawyer Karen Selick responded that we should  
Legalize the unsavoury, and repeal the huge sin taxes,  
Because "...We will never succeed in eliminating vice.  
Centuries of (criminalizing) laws have already proven that,  
Backfires every time, creating problems of far greater magnitude  
Isn't it time we stopped repeating the same mistakes?"

Each new escalation of the anti-smoking campaign  
Was claimed that one would eradicate tobacco smoking  
However, after the early successes of reductions,  
Further escalations result each time  
In a rise in youth smoking rates  
Adult smoking is also on the rise again  
Smokers tried to tell the anties that this would happen  
But anti-smokers refused to listen

April 2001

Once again anti-smokers have admitted they are losing the war  
And declared even worse draconian measures are required  
Including the removal of children from their smoking parents  
Placing the children in foster homes or wards of the state  
And prosecuting the parents for child abuse  
Will the anti-smokers' latest escalation solve the problem??  
or just create a whole lot more problems

April 2001

Smog is the real killer--Not tobacco  
The United States rejected the Kyoto Accord against smog  
Canada pledged \$ 1.20 billion to combat smog  
And \$ 480 million more tobacco taxes to combat smoking  
Anti-smokers are now 'hooked' on tobacco taxes

Littlewood & Fennell, P.A.  
Independent Public and Health Policy  
Research Center Austin, Texas,  
Study Report Sept 1999

In a Sealed room of approx 100 cubic metres,  
Or 20 feet square by 9 feet high, to reach the EPA  
published ETS danger levels requires the following  
# of cigarettes being smoked -- simultaneously:

Benzo(a)pyrene 222,000 cigarettes  
Acetone 118,000 cigarettes  
Acetaldehyde 14,000 cigarettes  
Hydrazine 14,000 cigarettes  
Hydroquinone 1,500 cigarettes  
Toluene 1,000,000 cigarettes

Cigarette Pack "WARNING -

In All sealed 20 foot square rooms,  
no more than 300 people smoking  
1,240 cigarettes per hour allowed !

**For 301 Smokers - Open a Window"**

Don't Drink 600 Coffees Simultaneously

While You Smoke 300 Cigarettes Simultaneously

Each Coffee has 1,000+ chemicals  
And both together might be lethal

**Simple Affordable Ventilation Works !**

The Majority of 'Never-Smokers' & 'Ex-Smokers'  
support everyone's Right to Choose  
And that Includes Public Places to Smoke  
**Smokers have No Right to force others to smoke**  
**Anti-Smokers have No Right to force us to Quit**  
**Nor bar us from jobs and services,**  
**such as medical care, but they do**  
**This is discrimination and persecution!!**

In Nazi Germany of World War II, Hitler Youth,  
Especially children in public school, were brain washed to believe  
Their parents were enemies of the state and German society  
Hitler was an anti-smoker

Today anti-smokers are brainwashing public school children  
To believe that the faintest molecule of tobacco smoke  
Will kill them regardless of distance  
And that their smoking parents are demonic murderers

The \$ Billions in tobacco taxes more than pays our way  
and we are at least 30% of all economic activities  
contributed to global society by Smokers  
Which benefits all people,  
including anti-smokers

The strongest, most ardent 'Anti-Smokers'  
Are often 'Ex-Smokers' who are  
Forced to quit when they Do Not Want To  
They are Very Angry at being forced to quit,  
Then become angrier, at themselves, for not wanting to,  
So --They MUST Believe the Lies about Tobacco  
**And, they will even knowingly Suppress The Truth**  
As the only ways to keep themselves smokeless.  
They find it Very difficult to cope with this self-anger,  
And so they 'externalize' their self-anger into  
Hatred Against Smokers and Tobacco  
**To force themselves to remain smokeless !**

Like Most Everything Humans Do

Smoking is Obviously Not Risk-Free,  
it can potentially harm you.  
Some people should not smoke,  
Just as some people should not drink, or drive,  
Or perform open-heart surgery.

Most Everything Humans Do Can Be Labelled 'Bad'  
Imagine

Your Car, Truck, Airplane, Boat, Roller Blades,  
Bathroom, Barbeque, Breasts - EVERYTHING  
Covered 60 % with 'death' warning labels !

Even vegetarians must kill to eat  
By Anti Standards, we should all commit suicide  
Indeed, if the everything-anties were right,  
We ALL would have been dead a long time ago !

Smokers derive pleasure & benefits from Tobacco  
**But it is Not Tobacco We Are Defending**  
**It Is Our Legal Right To Smoke It That We Defend**  
Indeed - the Freedom for All Choices and Lifestyles

There are over 1 Billion People on earth who Smoke  
for whom **Smoking is a Legal Lifestyle Choice**  
And, like all others who Choose their Legal Lifestyles,  
We have the Right to Our Legal Smoking Lifestyle

Like all humans, we are mostly decent average people  
We are the same as the majority of everyone else.  
**We work, paytaxes, raise families**  
**we are Not criminals**  
**We have the equal Rights**

To enjoy our pleasure from Smoking Tobacco  
And access to ALL the services of modern society  
that we help to build and support  
**Free from Persecution and Discrimination**

Why Is 'Demon Tobacco' Still Legal ?

From World War II to 1989 the world economy  
was built on and fueled by the 'ColdWar',  
The foundation for the 20th Century Gov't Tax Base  
The 'Cold War' collapsed because no-one could  
afford it anymore, and when it did, so did the tax base.  
It left behind nothing but the massive global debt

Since then, the people of the 'developed world'  
have demanded ever increasing tax reductions  
and drastically slash the size of Government itself.

Which has meant that Gov'ts have had to either  
fire all the government employees and cut off all the  
corporate welfare bums, & groups like the anties, or,  
find new tax revenues

**THIS IS 1 OF THE MAJOR TRUE REASONS**  
**FOR THE GLOBAL ANTI-SMOKING CAMPAIGN**  
**Tobacco is not 'that bad' It is just so easy to tax**  
**When people are fooled to believe it to be 'demonic'**

Second Hand Smoke  
is **NOT** a  
**Significant Health Risk**

## You Can Believe:

The World Health Organization (WHO), and the **International Agency for Research on Cancer (IARC)**

They are two extremely anti-smoking organizations. During the 1990's they set out to prove that Environmental Tobacco Smoke (ETS) kills at least 100's of 1,000's of people every year.

In July 1998 the World Health Organization (WHO) officially accepted the Report of a Study WHO had commissioned to be done by the **International Agency for Research on Cancer (IARC)** throughout 12 medical research centres in 7 European countries.

The study compared 650 lung cancer patients with 1,542 healthy people, it examined people who were married to smokers, worked with smokers, both worked with and were married to smokers, and those who grew up with smokers, to determine the effects of SHS, Second Hand Smoke, and the dangers from ETS, or Environmental Tobacco Smoke.

**The study found NO SIGNIFICANT HEALTH RISK from ETS-SHS !!**

**Instead of 17 %**, which is what the anti-smokers claim, based on the 'Manuscript Summary Report', Not the Original Research Study's Data, **the Real Risk Factor is, at most, ONLY 1.7 %**

The Original Data, which many anti-smoking groups refer to, is precisely 1 decimal point TO THE LEFT **Or in other words - 1000 % LESS** than what most anties believe the figures to be.

As of May, 2000, you still cannot find the Original Report on the WHO or IARC websites. What you can find dated March 1998 <http://www.iarc.fr/pageroot/PRELEASES/120E.HTM> is IARC's only response, claiming the Study data is Not being suppressed, and that a **Manuscript Report** which claims to **summarize** the findings has been released publically.

*The Manuscript Report claims the Original Report says that the risk factor is 1000% More than the Original Report itself actually says.*  
**There is NO SIGNIFICANT HEALTH RISK from ETS, And that it is In agreement with other major studies around the world, including the U.S.**

1996

Justice Finn of the Australian Federal Court ruled that the National Health & Research Council lied about the dangers of Second Hand Smoke, that they suppressed the 'no significant risk' evidence, **and anti-smokers were caught destroying data which proved No Significant Risk from ETS-SHS**

September 1998

Dildar Ahmad, MD and W. Keith Morgan, MD Chest Diseases Unit, London Health Sciences Centre, London, Ontario, Canada.

As hard as they have tried over 20 years to find one, They have **Not been able to find a link between SHS/ETS and Diseases.** March 2000 Update: Dr. Ahmad confirmed That the Sept 98 Letter to the Editor of CMAJ **is still true**

July 1998

Judge William Osteen, of the U.S. District Court for the Middle District of North Carolina, ruled that the U.S. Environmental Protection Agency (EPA) had knowingly, willfully, and aggressively disseminated false data claiming that ETS is a lethal health risk, and that this false claim has had far reaching wrongful regulatory implications against smoking Throughout North America And the Whole World.

February 2000

Oak Ridge National Laboratory finds Lower Second Hand Smoke Exposure: Tennessee Restaurant, Bar, and Tavern Study put Air Samplers on 173 workers and found their **exposure to ETS were Considerably BELOW Limits established by the Occupational Safety and Health Administration**

February 2000

David Goodfellow, Professor Algonquin College, Nepean, Canada Discovered that the ETS Risk Factors Being cited in Anti-Smoking Campaign By the Community Services Committee, Regional Municipality of Ottawa-Carlton Came from a Summary Report Of a Study that was published as "Occupational Exposure to ETS", Journal of American Medical Assoc, Vol 274, number 12, 1995, pg 959, Which were Exactly 10 Times Higher, **Or in other words- 1000% More In the Summary Report** Than the Risk Factors published In the original Research Report.

October 2000

University of Medicine, New Jersey Environmental & Occupational Health Sciences Institute Largest ever 12 year study of 146,488 women **concluded that there is NO Link and NO Risk between Second-Hand Smoke and Breast Cancer Deaths** Since SHS is No Risk to this Very Vulnerable Group Most probably also proves **SHS is NO RISK** to Anyone

**ON AVERAGE - SMOKERS LIVE LONGER**

Stat Analyst Rosalind B. Marimont has discovered: The 400,000 supposed deaths computed by the Center for Disease Control - SAMMEC - (Smoking Attributable Mortality, Morbidity and Economic Costs) shows that the Alleged smoking victims did not die early! On Average - Smokers live almost 2 years longer! 17 % Die Prematurely - Over Age 85 0.5 % ( 1/2 of 1%) of Smokers Die Under Age 35 **\*\* 8 % of Non-Smokers Die Under Age 35 \*\*** All Smokers Die --from Many Many Causes Anti-Smokers Counted Every Cause as Tobacco All Anti-Smokers Die Too **BUT More Anties Die Sooner than Smokers do More Worthy Issues and Information:** Highest smoking countries have lowest cancer rates Asthma & bronchitis are rising in homes & businesses the vast majority of which are non-smoking **ALL OF US have cancer cause-rs inside our bodies**

Ozone Holes over the Poles are REALLY BIG Rising illness from 'Bad-Air' in homes, offices, schools Summer Smog Warnings even for Healthy People Illegal drug use is rising exponentially Smoking is proving to alleviate and reduce symptoms of a growing number of genetic diseases Support for legalizing marijuana is growing very fast San Francisco has made obesity discrimination illegal First Gay Scout Troop formed in Toronto, Canada Same-Sex Married Rights Enacted in Ontario, Canada Netherlandshas approved Full Same-Sex Marriages Animals, including killer dogs, could very soon have More Citizen's Rights than Smokers Do. Evidence is growing that cell phones may cause headaches, fatigue, dizziness, memory loss, & cancer Asbestos is Everywhere, and, a Major Cause of Cancer Over 2,000 Nuclear Bombs have been exploded WorldWide - 80% live in substandard housing 70 % cannot read-50% suffer from malnutrition & starvation Wars are being fought over access to Clean & Polluted Water The same authorities who said:

salt, butter, saccharin, ethyl acrylate (used in making paint) And - marijuana - were bad, Now Say They Are Good 60 to 75% of all murders are done with guns Car accidents kill more people than all other causes New Anti-Biotics and other Pharmaceuticals from Genetically Modified Crops, Including TOBACCO, is 'Growing' into a Trillion Dollar Industry Share values of tobacco companies continue to outperform almost all other industry sectors People have been Smoking for 1,000's of Years! Hitler, Mussolini, & Franco were Anti-Smokers Churchill, Roosevelt, & Stalin were Not Majority of non-smokers say Yes - Accommodate Smokers and that Businesses should be allowed to 'Choose' Anti-smoking groups are funded from growing Tobacco Levies Anti-smoking administration jobs depend on it - is that good ? Anti-smoking propaganda is 'hate discrimination' Smoke-Free Homes and Cars is their next goal Smoking is just one of many 'Choices' "THEY" want gone meat, candy, sugar, coffee, pizza, donuts, barbecues, alcohol abortions, gays, (non-whites and non-christians too?) mothergoose, shakespeare, harry potter, and many more **The Right To Choose-FOR ALL OF US-Is Being Taken Away**

"...if you believe in it, it is a religion or perhaps the religion; if you do not care one way or another about it, it is a sect; but if you fear and hate it, - it is a cult."

Leo Pfeffer

Anti-smokers fear and hate smokers, and believe that the object Of their fear and hatred, tobacco smoking, is a demonic cult.

Pfeffer meant it is the fear and hatred that is the actual cult

Many anti-smokers are 'extremely' religious Beyond the call of duty, to the point of obsessing about sin Particularly where there isn't any The clinical name for this biochemical malady is 'scrupulosity' And considered to be a form of obsessive compulsive disorder Which affects 1-in-40 of all adults and 1-in-100 children 60 to 80% can be successfully treated with anti-depressants Combined with psychological and ministerial counselling

Tobacco is - as is - not much of a risk Still, it does have potential risk to harm and kill some smokers

Mapping the Human Genome Has finally opened the gates to treating and even curing Many diseases and maladies we could not fight before Including all potential risks of smoking genetically un-modified tobacco

Transgenic Engineering - Genetically Modified Tobacco

From attempts to create a 'safe' cigarette Big tobacco companies discovered that tobacco is the cheapest, fastest, most efficient domestic crop To induce with human genetic materials for producing drugs Such as new anti-biotics, vaccines, insulin and many others, even human blood constituents by growing it inside tobacco At a fraction of the cost of preceding methods

It was also discovered that the cheapest, fastest, most efficient Method for delivering medicinal drugs into the human body is by inhalation directly into the lungs

It did not take them very long to realize they can make tonnes more money from prescription tobacco For treating many diseases, including cancer, Than they ever can from pleasure & self-medicating smokers

This may explain why big tobacco companies: Bought up a lot of Pharmaceutical companies, pharmacy chains, Agricultural land, research facilities, processing plants, And related distribution networks

Share values of big tobacco companies continue to rise Despite the pending massive class-action lawsuits

Their continued presence, even control, at the very pinnacle Of the World Health Organization and Governments

Their continuing efforts to prevent top secret documents From falling into hands of public scrutiny

Their agreeing, even insisting, that tobacco and cigarettes be regulated as a drug delivery system by the U.S. FDA

Their increasing public support for the anti-smoking campaign

Genetic Tobacco drug growing farms began test productions Officially approved - in the year 2000
