

Math 511: Linear Algebra

Amended Course Calendar
Summer 2014

This is a tentative outline of what we'll cover in this course, and the order that we will cover it. Exam dates are fixed, but the material that each exam covers could change. The only way to know for sure what an exam will cover is to attend class regularly.

Notice that no sections from chapters 1 or 2 are explicitly listed in the calendar. This does *not* mean that we won't cover them. In fact, we will cover everything from chapters 1 and 2 as examples, exercises, and methods of solving problems in chapters 3 and 4. Thus, we should be finished with all of chapters 1, 2, 3, and 4 in the first 4 weeks of the semester.

Again, this schedule is subject to change based on how the semester goes. However, everything in **red** should be considered fixed.
